Hiring Manager
Fujitsu AI Lab
Bangalore, India
Req Id: 10321

Dear Hiring Manager,

I am writing to express my strong interest in the **AI Researcher** position at Fujitsu AI Lab, Bangalore (Req Id: 10321). As an AI/ML Engineer and researcher pursuing an Integrated M.Tech in Artificial Intelligence with hands-on expertise in generative AI, agentic AI systems, multi-agent architectures, and graph-based AI, I am eager to contribute to Fujitsu's mission of making the world more sustainable through innovation.

Why I am a strong fit for this role:

Agentic AI & Multi-Agent Systems: At Revenuxe, I designed agentic AI architectures with multi-agent orchestration using LangChain and Python, building autonomous systems with tool-use, chain-of-thought reasoning, and knowledge representation. I won the national Agentic AI Hackathon 2025 (NielsenIQ & TCS) building ALPS – an autonomous multi-agent system. At NgKore Foundation, I build AI agents with planning and self-correction capabilities for 5G network automation.

Generative AI & Neural Architectures: Deep practical experience with transformer-based architectures, RAG pipelines, attention mechanisms, and LLM-based reasoning. My work includes novel retrieval strategies, prompt engineering frameworks, and inference optimization – directly aligned with Fujitsu's Generative AI and cognitive AI research.

Graph AI & Knowledge Representation: At IIT Guwahati, I implemented a custom graph database (LadyBugDB) with novel graph traversal algorithms for function call graphs and control flow analysis. Experience in causal reasoning for vulnerability propagation and explainable AI aligns with Fujitsu's Graph ML research.

Research-to-Production & Cross-Disciplinary Impact: I consistently transition research into production – from AI sustainability platforms with NVIDIA NIM (BharatGreen AI) to autonomous satellite analysis pipelines (Light Pollution Sentinel). My work spans cybersecurity, sustainability, telecommunications, and enterprise AI, demonstrating the multi-disciplinary adaptability Fujitsu values.

I am excited to contribute to Fujitsu AI Lab's cutting-edge research in Generative AI, Cognitive AI, Graph ML, and multi-agent systems. I am based in India and available to relocate to Bangalore immediately.

Thank you for considering my application. I look forward to discussing how my research background and technical expertise can advance Fujitsu's AI strategy.

Sincerely,

Shreyas Gupta
